Prior art Tanji (JP 10-320-194) discloses an effect giving device and recording medium. Prior art Yamamoto, US 5,942,708, discloses a tone generator with diversification of waveform using variable addressing including an input device, a hard disk drive, a plurality of operating members an assigning device, a memory, a control device. Prior art Saito, US 6,198,035, discloses a musical sound signal generation apparatus. Prior art East, US 6,061,458, discloses an audio mixing console. Prior art Ito, US 5,300,723, discloses an electronic music device including a switch panel and a switch detection circuit. Prior art Suzuki et al., US 5,831,193, discloses a method and device for forming a tone waveform by combined use of different waveform sample forming resolutions including a hard disk drive, a RAM having a working memory. Prior art Haruyama, US 5,902,948, discloses

a performance-instructing device including a RAM memory that temporarily stores automatic performance data, and a switch panel and a switch-detecting panel. Prior art Kondo et al., US 5,668,337 discloses an automatic performance device including a display including a channel change table used to assign data to certain channel, a switch operation detection circuit. Prior art Yamamoto et al, US 6,573,444, discloses a music data compression apparatus and method including a hard disk drive having a primary memory that temporarily stores musical pieces recorded on a music CD and when a user presses a digital dubbing key the data stored in the primary memory, compressed and the compressed data is stored in a secondary memory.

Regarding claim 5, the prior art or combination thereof fails to disclose or make obvious "an assigning device that assigns at least one of the plurality of second audio data stored in said built-in hard disk device and at least one of the plurality of third audio data stored in said external storage device respectively to at least one of said plurality of operating members" and "said control device that is responsive to said assigning device assigning the third audio data, respectively, to the at least one of said plurality of operating members, for causing said built-in hard disk device to temporarily store the assigned second audio data and causing said memory to store the assigned third audio data, said control device being further responsive to said assigning devices assigning the second audio data, respectively, to the at least one of said plurality of operating members, for reading out the assigned second audio data from said built-in hard disk

device and causing said memory to temporarily store the assigned second audio data without double storing the assigned second audio data in said built-in hard disk”.

Regarding claim 14, the prior art or combination thereof fails to disclose or make obvious and “using a controlling module to cause, in response to assigning the third audio data, respectively, to the at least one of said plurality of operating members in said assigning module, the built-in hard disk to temporarily store the assigned second audio data and causing said memory to store the assigned third audio data, and reading out, in response to assigning the second audio data, respectively, to the at least one of said plurality of operating members in said assigning module, the assigned second audio data from the built-in hard disk device and causing the memory to temporarily store the assigned second audio data without double storing the assigned second audio data in the built-in hard disk”. Therefore the prior art or combination thereof fails to disclose or make obvious a mixing device and method as claimed.

Claim 8 is allowed due to dependency on claim 5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
